

## Go4Clients – Centrex Integration

The following document describe the procedure to integrate the G4Clients landing pages platform with the Centrex platform.

### Description

A form designed in G4Clients landing page platform, can send in real time the information to your Centrex platform, more detailed example as follows:

1. Design the landing page, add all the fields required, you can add as many as you want of any type. Check Illustration 1 for more details.

*Illustration 1: Landing page example*

2. All the created fields in the landing page will be sent to the Centrex platform with the same names you entered while designing the landing page.
3. In the Centrex platform you must then map the configured fields in the landing page with the ones that make sense for your reports in your Centrex platform.
4. Send an email to your sales representative or to [support@Go4Clients.com](mailto:support@Go4Clients.com) requesting to add the Centrex integration for your account. Remember to include your account details (login), and the URL of your Centrex application (Ex: <https://login.centrexsoftware.com/post/123456789123456789123456789>).

Done! With these simple steps you will be able to have your customers information in real time. When an user submit the form in the landing page your Centrex system will receive the information via the URL provided, with all the information captured in the landing page.
